50X1-HUM

1. A new oil field has been discovered at Nagy Lengyel about 10 km. south-southeast of Zalaegerszeg. The Hungarian Oil Research Institute estimates the deposit contains 20 million tons of oil. The analysis of the crude yields only 15-19% light oils (gasoline and kerosene), the balance being fuel oil and asphalt.
2. In 1952 Hungarian oil production was about 450,000 tons. In 1949, when special efforts were made, output rose to 700,000 tons, but this could not be maintained.
